

The Titan Introduction (The Out Of Town Guests Book 1)

Fellow earthlings, get ready for a feel good comedy about the aliens that bio-engineered us back some three million years ago. They started the process back then and now want to stop back by earth and say hi while they reintroduce themselves to their progeny, the people of earth. Now they couldnt just land and say, Take me to your leader. Oh no, that would be too simple. Instead they enlist the help of an Earther named Alex and start a wild ride to show us who we are. Find how the pyramids were built and why the pyramids have a point on the top. Why did Atlantis disappear? What do they really do with a straw? Find out who has been helping us all along and what the secret power source is that we havent discovered yet. Follow the Alex and Yando through one mishap after another as the aliens turn out to be bunglers just like their descendants. Huh, I wonder where we got that from?
