

# Writing Greek: An Introduction to Writing in the Language of Classical Athens

Planned as a companion volume to Writing Latin by Richard Ashdowne and James Morwood, this accessible guide to writing Greek is useful for anyone starting Greek prose composition. Part 1 deals with the constituent elements of the simple sentence, and in Part 2 all major constructions are covered, each with thorough explanations and clear examples. Each chapter has either two or three exercises of practice sentences, further supplemented throughout Part 2 by passages for continuous composition. 100 important irregular verbs with their principal parts are listed at the back of the book, and there is a complete vocabulary for all the exercises, a useful learning and revision resource in itself.
